DETAILED ACTION

Election/Restrictions

1. Restriction to one of the following inventions is required under 35 U.S.C. 121:

- I. Claims 1-15, 18-23, 30-36, and 51-64 drawn to an apparatus with a recess, classified in class 118, subclass 713.
- II. Claims 24-29, and 65-69 drawn to a method of processing a substrate, classified in class 216, subclass 2+.
- III. Claims 17, and 37-43, drawn to an apparatus with a recess having a magnetic field, classified in class 118, subclass 713.
- IV. Claims 16, and 44-50, drawn to an apparatus with a recess having an electric field, classified in class 118, subclass 713.

The inventions are distinct, each from the other because of the following reasons:

2. Inventions Group II and Group I, Group III, or Group IV are related as process and apparatus for its practice. The inventions are distinct if it can be shown that either: (1) the process as claimed can be practiced by another materially different apparatus or by hand, or (2) the apparatus as claimed can be used to practice another and materially different process. (MPEP § 806.05(e)). In this case the apparatus as claimed can be used to practice another and materially different process such as a method that includes pre-coating the inside of the chamber, treating the substrate, and cleaning the chamber after, or a method that includes providing a magnetic and electric field around the recess.

Art Unit: 1763

3. Inventions Group I, Group II, and Group III are unrelated. Inventions are unrelated if it can be shown that they are not disclosed as capable of use together and they have different modes of operation, different functions, or different effects (MPEP § 806.04, MPEP § 808.01). In the instant case the different inventions have different modes of operation.

4. Because these inventions are distinct for the reasons given above and have acquired a separate status in the art because of their recognized divergent subject matter, restriction for examination purposes as indicated is proper.

5. A telephone call was made to Ashok K. Janah on December 13, 2002 to request an oral election to the above restriction requirement, but did not result in an election being made.

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

6. Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Jeffrie R. Lund whose telephone number is (703) 308-1796. The examiner can normally be reached on Monday-Thursday (6:30 am-6:00pm).
